USAREUR Adjusts Child and Youth Services Fees

U.S. Army, Europe, is implementing new Child and Youth Service fees based on Department of Defense changes beginning in March. One new change is that the income limit for Category I families has been raised from \$23,000 to \$28,000. Another change is that dual military couples living off post will benefit from a change in the way Basic Allowance for Housing is calculated. Under the new plan, only the BAH for the senior member of the dual military couple will be used to determine total family income.

Other discounts are available in Europe, including a 10-percent multiple child discount for patrons using regular full day and part day CYS programs in Child Development Centers, discounts for the School Age program and a 10-percent discount for patrons using the before and after school age programs. For more info visit the 6th Area Support Group Web site at www.stuttgart.army.mil. Click on "community" then "bulletin board."

Oxycontin Abuse On The Rise

Oxycontin is an extremely popular pain killer and opium derivative that is available by prescription in 10, 20 and 40 milligram tablets. It is exceedingly potent and it comes in a time-release tablet that lasts for up to twelve hours. Patients who are prescribed Oxycontin are usually cancer patients or people that suffer chronic pain. The FDA warns against possible serious side effects including chest pain, muscle weakness, severe rashes, clammy skin, seizures, overdoses and death. Over the last eighteen months Oxycontin has been linked to over 100 deaths.

Recently Oxycontin has become more and more popular as a drug among today's youth. Many youth are ingesting the drug by crushing it

up and either swallowing or snorting it. This is extremely dangerous because when the tablet is crushed the time release mechanism is destroyed and this could potentially cause a lethal ingestion of the chemical. For info about the dangers of Oxycontin abuse, visit www.dea.gov.
